### September 15 Deadline for Kettler Lights

Sept. 15 is the deadline for getting all the money in, said Carlson.

The Homeowners association has pointed out that when the residents pay their share of \$15 it will be the first and last payment and the lights will be installed immediately.

If, on the other hand, full cooperation is not realized at the present time, the residents of Tracts 1 and 5 will be forced to request the city to install the lights at the cost of \$150 per resident which will have to be paid out a \$15 a year for a period of 10 years.

### Letters to Editor

September 8, 1950.  
Editor, Press:

Congratulations on your story about the "one man" control of the traffic in Torrance.

Does the "supreme power" tell the officers to hide down such streets as Plaza del Amo, Santa Fe avenue, or Cota street and other blinds to spy on traffic. We understand this to be against the law, but I guess he makes the law.

We know one thing. The traffic system employed here is driving a lot of business away from us on Torrance boulevard. Motorists don't like it so they avoid it when they can.

Yours for more and better news. You are doing a grand job, Mr. Editor.

Very sincerely,  
M. J. B.

Kin to radar, "Jump-Jump" hurls television from point to point on radio beams aimed like a searchlight.

### WEST'S FIRST TELEVISION NETWORK

Relay system to operate between San Francisco and Los Angeles

1. Amplifying equipment like this is connected with the hornlike antennas above to relay television programs or long distance telephone calls from one part of the country to another. Engineers call it micro-wave... for it uses high-frequency radio waves, and it gets its nickname, "Jump-Jump," because the beams leap-frog between relay stations located on mountains 28 to 65 miles apart.

2. Television programs can be relayed from one point to another by micro-wave or by coaxial cable. The first leg of a Western television network will begin operating between San Francisco and Los Angeles September 15 over the newly-completed "Jump-Jump" system. And we're going ahead with surveys and experiments to extend the television network to other areas of the West.
